GameMaster Guide

30-Day Partnership Proposal for Meepleville Board Game Cafe

Las Vegas, Nevada | March 2026

Prepared by Tim Pham | tim@playgmg.com

The Challenge

01 Teaching Bottleneck

With 2,600+ games, staff can't teach them all. Customers pick the same 10 games they already know, leaving 95% of your library collecting dust.

02 Game Finder Pain

Staff look up games in Google Sheets to check availability and shelf location. Manual, slow, and breaks the customer experience.

03 Missed Revenue

Customers leave the table to order at the counter, breaking game flow. Some skip ordering entirely rather than interrupt their game.

Your Full Library, On Every Phone

+200 games searchable by category, player count, time, and difficulty
Customers find exactly what they're looking for in seconds.

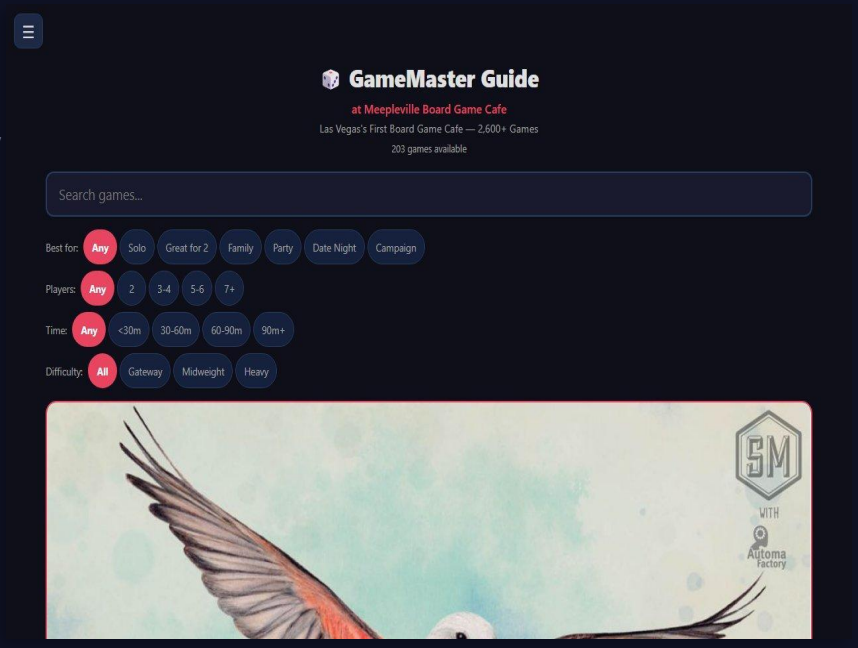
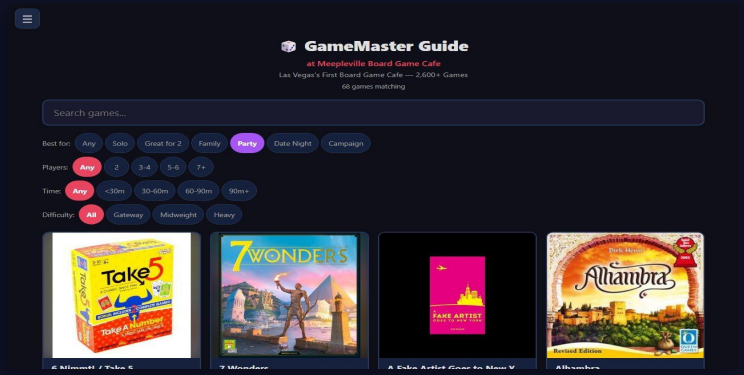
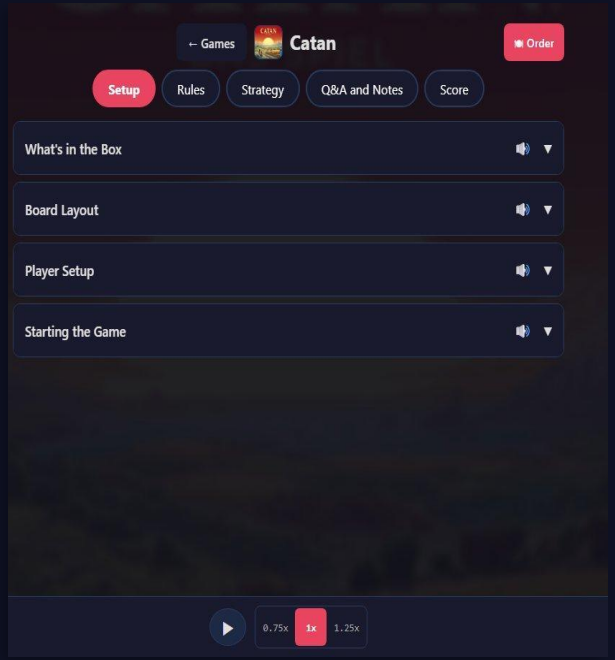
To Find



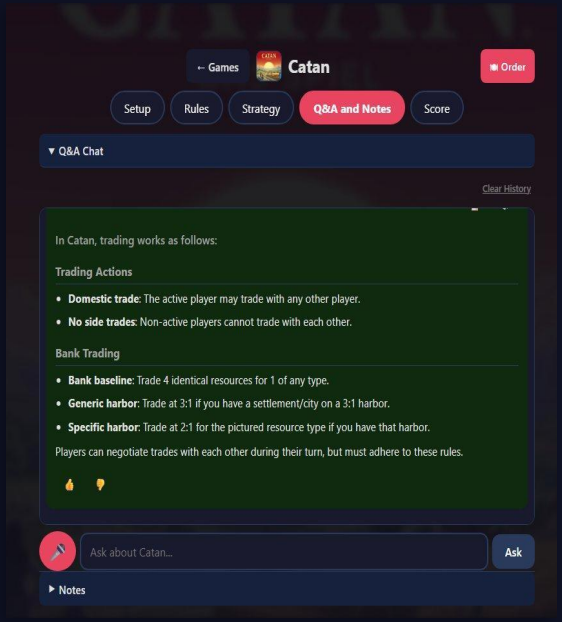


Voice-Guided Game Teaching

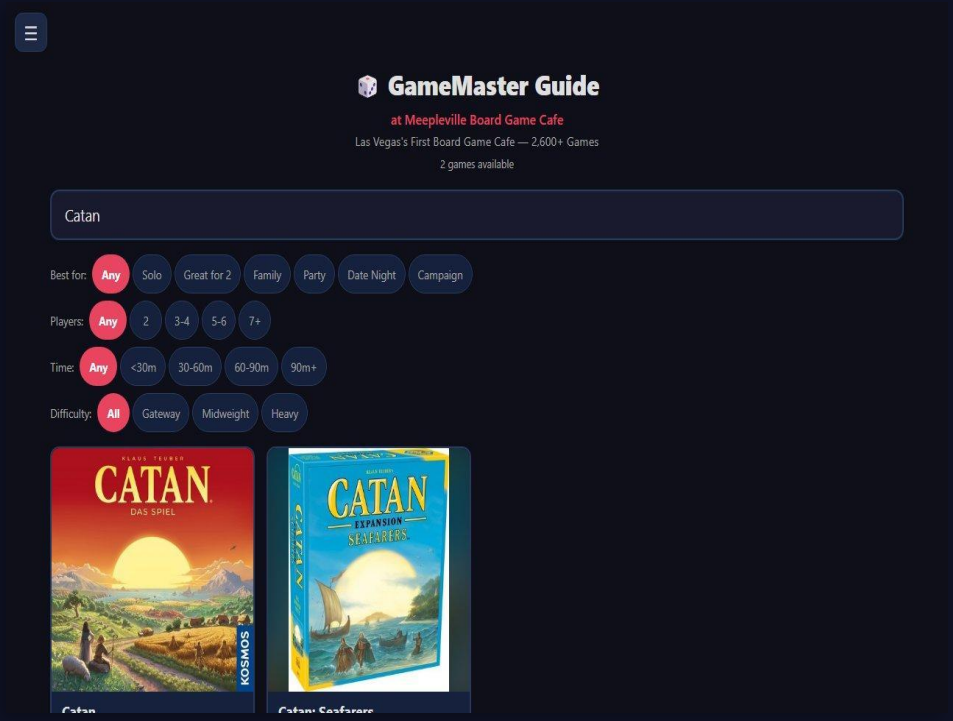
Every game has structured guides for Setup, Rules, and Strategy. Each section can be read aloud with text-to-speech at adjustable speeds. Multiple players at the same table follow along on their own phones.



Setup Guide with Voice Playback



AI Q&A for Mid-Game Questions



Game Finder

Replace Google Sheets with instant search. Staff and customers type a game name and instantly see if you have it and exactly where it's located on the shelf.

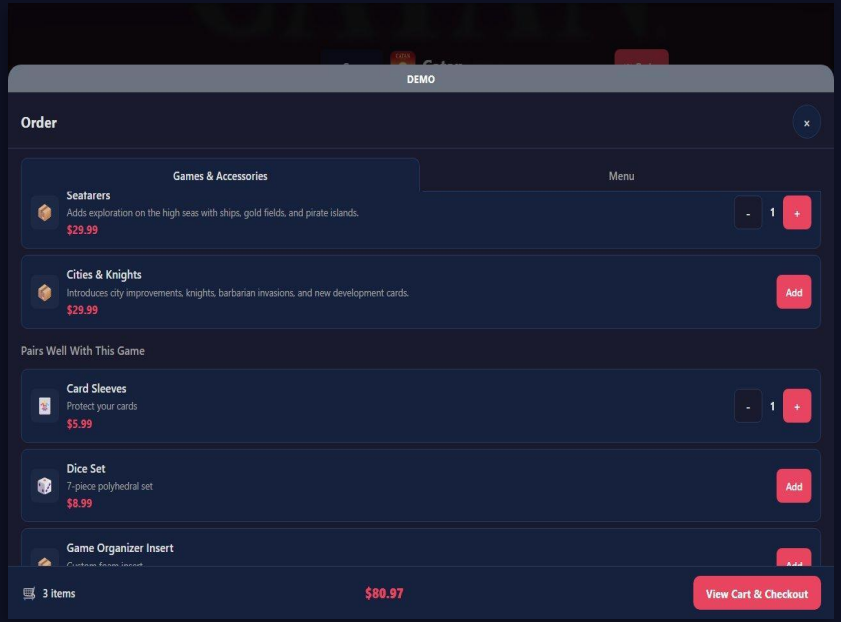
Before: Google Sheets lookup, ask staff, check shelves manually

After: Search on your phone, see shelf location instantly

We import your existing spreadsheet directly. No re-entering data.

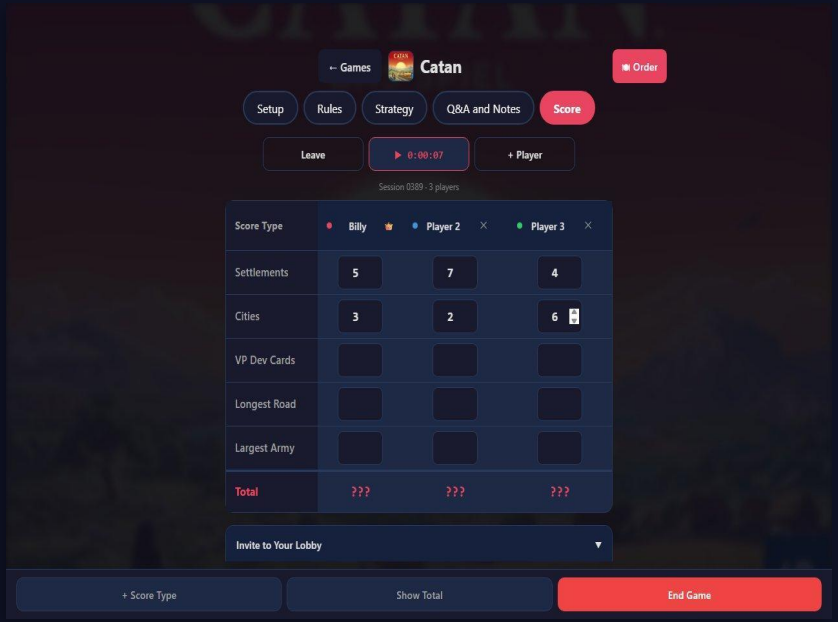
Order Food & Track Scores

Customers order food and drinks from their phone without leaving the game. Staff get notified with the table location for delivery, or customers get a pickup alert.



F&B and Game Accessory Ordering

Game-specific score tracking keeps groups engaged for the full session.



Per-Game Score Tracking with Lobby

Your Venue Dashboard

See exactly what's happening in your venue.

- Sessions
- Top games
- Peak hours
- Orders

30-Day Pilot Plan

Full Premium package. No credit card. No commitment.

Week 1
Mar 16-22

Onboarding & Game Finder
Import your full catalog from Google Sheets. Set up shelf locations. Game teaching live on phones for all 250+ members.

Week 2
Mar 23-29

Food & Beverage Ordering
Menu loaded, ordering live. Customers order from their phones. Pickup notifications or staff table delivery alerts.

Week 3
Mar 30 - Apr 5

Optimization
Review analytics: top games, customer questions, order volume. Fine-tune based on real usage patterns and staff feedback.

Week 4
Apr 6-12

Results Review
Sit down together, walk through the numbers. Impact on operations, staff feedback, customer satisfaction. Discuss next steps.

What's Included in Your Pilot
